school student trying to meet Common Core Standards.

Algebra is a branch of mathematics that uses letters and other symbols in equations to represent unknown values and then uses what is known to figure out what is unknown. For example, if  $5x = 40$  (that is, 5 multiplied

# Bookmark File PDF Algebra 1

by  $x$  equals 40), you know that  $x = 8$  because given what we've been told — the known information — 5 is the only number that makes the number sentence true ( $5 \times 8 = 40$ ).
