In our view, synthetic biology is an extension of the continuum of genetic science that has been used safely for more than 40 years by the biotechnology industry in the development of commercial products. Examples of synthetic biology use by biotechnology companies illustrate the potential to substantially reduce research and development time and to increase speed to market.

With growing interest in biotechnology fuelled by the COVID-19 pandemic, it is anticipated that new research and work opportunities will arise. Many of our biotechnology science graduates secure roles working as research associates and technicians in clinical and research laboratories, at research universities, and at pharmaceutical and biotechnology organisations, both in the UK and worldwide.
