Designing a survey or questionnaire involves much more than just choosing what questions to ask. There are multiple factors that influence your project's success or failure, so be sure to consider these 10 key factors when you're creating your survey.

10 Key Things To Consider When Designing Surveys

Designing and Conducting Business Surveys provides a coherent overview of the business survey process, from start to finish. It uniquely integrates an understanding of how businesses operate, a total survey error approach to data quality that focuses specifically on business surveys, and sound project management principles.

Designing and Conducting Business Surveys (Wiley Series in---

Before you design your questionnaire, clearly articulate what decision, problem or need is to be addressed by the answers to them. For example, review why you are doing the evaluation and what you hope to accomplish by it. This provides focus on what information you need and, ultimately, on what questions should be in the questionnaire.
