Let us say you have a fully synthetic oil whose SAE rating reads 5W-30. The 5W means that the oil has been tested at colder temperatures and that it has a viscosity grade of 5 and with the "W" referring to winter. The 30 reflects the viscosity grade of the oil when the engine temperature is at 212 ° F. If you live in a colder environment, a 5W rating oil will be able to start your engine a lot sooner than a 10W rated oil.
