Written in the first decade of the new millennium, DNA reflects early-aughts anxieties about the roles of violent media, gang activity, and millennial apathy in contemporary society. The pressures of life on the city streets and the process of entering adulthood in post-industrial London are intense, and the characters' attitudes varyingly reflect a blend of serious apprehension and disconnected or even dissociated ennui.

It sounds pretty scary, but the principle is straightforward. Double stranded DNA is heated and the strands are separated or denatured. A short sequence of nucleotides called a primer is used to bind to a known sequence near the 3' end of the DNA. DNA polymerase, the four dNTPs (dATP, dCTP, dGTP, and dTTP), and the primers are added to the tube.

The guide offers clearly defined learning objectives, summaries of key concepts, references to Life and to the student Web/CD-ROM, and review and exam-style self-test questions with answers and explanations.

It also offers a number of teaching ideas and activities as well as tips on answering an exam question.

Dennis Kelly's play DNA centres on friendship, morality and responsibility in odd circumstances. When a group of young friends are faced with a terrible accident, they deliberately make the wrong choices to cover it up and find themselves in an unusually binding friendship where no one will own up to what they've done. The play began life as a National Theatre Connections commission in 2008 and has subsequently been produced, studied and toured around the world. DNA is published for the first time in the Methuen Drama Student Edition series with commentary and notes by Clare Finburgh Delijani, which look at the play's context, themes, dramatic form, staging possibilities and production history, plus offers suggestions for further reading.
