I used this text in 2000 for my advanced DOS class. Jamsa does a great job in explaining DOS without over-explaining. The end is a complete index of all DOS commands, and most of them are useful in command prompt today. I use this text to generate batch files to automate Windows administrative tasks.

The DOS API is an API which originated with 86-DOS and is used in MS-DOS/PC DOS and other DOS-compatible operating systems. Most calls to the DOS API are invoked using software interrupt 21h (INT 21h). By calling INT 21h with a subfunction number in the AH processor register and other parameters in other registers, various DOS services can be invoked. These include handling keyboard input ...

When you used the /p switch with the dir command, you specified that MS-DOS should pause after it displays each screen of directory list information. The p actually stands for "page" Another helpful switch you can use with the dir command is the /w switch. The /w switch indicates that MS-DOS should show a wide version of the directory list.
