Method 1. Draw a line AB equal in length to one of the sides and produce AB to P. Calculate the exterior angle of the polygon by dividing $3600/7 = 51\ 30/7$. Draw the exterior angle PBC so that $BC = AB$. Bisect AB and BC to intersect in O. Draw a circle, centre O and Radius OA (=OB = OC).

Using a residential design scenario that increases in scope from chapter to chapter and results in a complete set of working drawings, Drafting and Design: Basics for Interior Design teaches the art of drafting through hands-on application. Introducing essential drafting tools, equipment, and methods, the book is designed to help interior designers develop an understanding of space planning and leverage manual drafting skills to design usable and livable space.

Pipe designers and drafters provide thousands of piping drawings used in the layout of industrial and other facilities. The layouts must comply with safety codes, government standards, client specifications, budget, and start-up date. Pipe Drafting and Design, Second Edition provides step-by-step instructions to walk pipe designers and drafters and students in Engineering Design Graphics and Engineering Technology through the creation of piping arrangement and isometric drawings using symbols for fittings, flanges, valves, and mechanical equipment. The book is appropriate primarily for pipe design in the petrochemical industry. More than 350 illustrations and photographs provide examples and visual instructions. A unique feature is the systematic arrangement of drawings that begins with the layout of the structural foundations of a facility and continues through to the development of a 3-D model. Advanced chapters discuss the customization of AutoCAD, AutoLISP and details on the use of third-party software to create 3-D models from which elevation, section and isometric drawings are extracted including bills of material. Covers drafting and design fundamentals to detailed advice on the development of piping drawings using manual and AutoCAD techniques 3-D model images provide an uncommon opportunity to visualize an entire piping facility Each chapter includes exercises and questions designed for review and practice

With increased emphasis on visualization, the design process, and modern CAD technology, this edition of our popular Engineering Drawing and Design book provides readers with an approach to drafting that is consistent with the National Standards Institute (NSI) and the American Society of Mechanical Engineers (ASME). Newly reorganized, the first half of the book focuses attention on sketching, views, descriptive geometry, dimensioning, and pictorial drawings. The second half of the book invites readers to build upon these skills as they explore manufacturing materials and processes that span all of the engineering disciplines, including: welding, fluid power, piping, electricity/electronics, HVAC, sheet metal, and more! Each chapter contains realistic examples, technically precise illustrations, problems and related tests. Step-by-step methods, plus layout guidelines for preparing technically precise engineering drawings from sketches, are also featured throughout the book to provide readers with a logical approach to setting up and completing drawing problems. Ideal for use in introductory and advanced engineering graphics programs, the extraordinarily complete and current information in this book makes it an invaluable reference for professional engineers.

Designed for a traditional drafting environment, the Worksheets allow students to get hands-on practice solving drafting problems. Problems from the text are reproduced on drawing sheets (with border and title block included) to reduce layout work.

This resource on architectural drafting introduces the topic specifically for beginning interior designers. This second edition adds a new chapter 14, 'Incorporating the Computer,' which covers integrating software with hand drafting. Content reorganization - like new chapter 3, '2D and 3D' - makes this edition even more intuitive, with specific topics easy to locate.
