Acute resuscitation and care of unstable and critically ill patients can be a daunting experience for all trainees in the emergency department or the intensive care unit. The practical, easy-to-read and evidence-based information in Practical Emergency Resuscitation and Critical Care will help all physicians understand and begin management of these patients. This book offers the collaborative expertise of dozens of critical care physicians from different specialties, including but not limited to: emergency medicine, surgery, medicine and anaesthesia. Divided into sections by medical entities, it covers essential topics that are likely to be encountered in the emergency department where critical care often begins. The portable format and bullet point style content allows all practitioners instant access to the principle information that is necessary for the diagnosis and management of critical care patients.

Prepared by attending physicians at Harvard Medical School, Pocket ICU, follows the style of Pocket Medicine, one of the best-selling references for medical students, interns, and residents. This pocket-sized loose-leaf resource can be used on the wards or in the operating room. Information is presented in a schematic, outline format, with diagrams and tables for quick, easy reference. Content coverage is brief but broad, encompassing all the subspecialty areas of critical care including adult and pediatric critical care, neuro-critical care, cardiac critical care, transplant, burn, and neonatal critical care.

Pocket Emergency Medicine, Fourth Edition, provides accurate, actionable, and easily accessible information for clinicians on the front lines of emergency care. Designed to be used at the bedside, it's an outstanding go-to source for the essential information you need to care for patients in life-threatening situations. This volume in the popular Pocket Notebook series provides a concise and focused review of the entire field of emergency medicine — from history and physical exam to differential diagnosis testing to therapeutics to disposition – all in one easy-to-navigate looseleaf notebook.

This guide is designed with the special needs of field practitioners in mind. This useful, quick reference guide helps speed recognition of lab values, 12 lead ECG interpretation, fibrinolytics agents, hemodynamic monitoring, IABP's, rapid sequence intubation, chest tubes, and therapeutic medications and toxicology for the critical care transport provider.
