Forensic scientists in their roles as expert witnesses or as laboratory employees experience restrictions on their exercise of professional discretion which raise questions about their ability to act responsibly in the criminal justice system.

Ethics and the Forensic Sciences: Professional Autonomy in ...

Ethics in Forensic Science. Renowned forensic scientist Paul L. Kirk once stated “ Physical evidence cannot be wrong, it cannot perjure itself, it cannot be wholly absent. Only human failure to find it, study and understand it, can diminish its value. ” . Ethics here is dealing with values related to human conduct, with respect to the rightness and wrongness of certain actions, and to the goodness and badness of the motives and ends of such actions.

Ethical issues across different fields of forensic science ...

One reason why ethics is so important in the field of forensic science is because the results yielded by physical evidence discovered at a crime scene have a great impact on the lives of others (Barnett, 2001). When evidence is mishandled, manipulated, or misinterpreted the outcome of the case is altered (Ayres, 1994).

Ethics and Training in Forensic Science

Most practitioners in forensic science and forensic medicine are committed, hard-working, ethical professionals; however, education and guidance on professional responsibility is uneven and there is no enforceable universal code of professional responsibility. In addition, when an adverse event

Biometrics and Forensics Ethics Group - GOV UK

FORENSIC SCIENCE —the application of science to civil and criminal law—is a field that is grounded in applied ethics. The identification, collection, and preservation of any piece of forensic evidence will ultimately involve numerous individuals. At any step within the process, evidence can be deliberately or accidentally mishandled.
