Gravity Falls Journal 3 Limited Blacklight vs. Standard EditionGravity
Gravity (from Latin gravitas 'weight'), or gravitation, is a natural phenomenon by which all things with mass or energy—including planets, stars, galaxies, and even light —are brought toward (or gravitate toward) one another. On Earth, gravity gives weight to physical objects, and the Moon's gravity causes the ocean tides.The gravitational attraction of the original gaseous matter present ...

Gravity - Wikipedia
Gravity definition is - dignity or sobriety of bearing. How to use gravity in a sentence.

Gravity | Definition of Gravity by Merriam-Webster
Gravity is what holds the planets in orbit around the sun and what keeps the moon in orbit around Earth. The gravitational pull of the moon pulls the seas towards it, causing the ocean tides. Gravity creates stars and planets by pulling together the material from which they are made. Gravity not only pulls on mass but also on light.

What Is Gravity? | NASA Space Place – NASA Science for Kids
Gravity, also called gravitation, in mechanics, the universal force of attraction acting between all matter. It is by far the weakest known force in nature and thus plays no role in determining the internal properties of everyday matter.

gravity | Definition, Physics, & Facts | Britannica
Gravity as a universal force Today, scientists know of four forces — things that attract (or repel) one object to (or from) another. The strong force and the weak force operate only inside the...

What Is Gravity? | Space
Gravity is believed to be mediated by the graviton, although the graviton has yet to be isolated by experiment. Gravity is weaker than the strong force, the electromagnetic force, and the weak force. Also called gravitation See more at acceleration relativity.

Gravity | Definition of Gravity at Dictionary.com
Gravity is one of the four fundamental forces in the universe, alongside electromagnetism and the strong and weak nuclear forces. Despite being all-pervasive and important for keeping our feet from...

What is gravity? | Live Science
Directed by Alfonso Cuarón. With Sandra Bullock, George Clooney, Ed Harris, Orto Ignatiussen. Two astronauts work together to survive after an accident leaves them stranded in space.

Gravity (2013) - IMDb
Gravity is the weakest of the four basic forces in nature, being weaker than the strong nuclear force, the electromagnetic force, and the weak nuclear force. See more at acceleration, relativity. 2. This force as it operates in and around the Earth and other massive objects (such as the planets).

Gravity - definition of gravity by The Free Dictionary
where G is the gravitational constant, m1 and m2 are the masses of the two objects for which you are calculating the force, and d is the distance between the centers of gravity of the two masses. G has the value of 6.67 x 10E-8 dyne * cm 2 /gm 2.
