User Guide - Hewlett Packard LoadRunner 11.50 was released on June 5th, during HP Discover 2012 in Las Vegas. This release was originally going to be called LoadRunner 12.00, but this would have put it out of step with the version numbers for ALM/Quality Center and QTP, which might have created some marketing confusion. ...

Test Automation using Selenium with Java - This book teaches how to automate using Selenium.

This practically-focused textbook provides a concise and accessible introduction to the field of software testing, explaining the fundamental principles and offering guidance on applying the theory in an industrial environment. Topics and features: presents a brief history of software quality and its influential pioneers, as well as a discussion of the various software lifecycles used in software development; describes the fundamentals of testing in traditional software engineering, and the role that static testing plays in building quality into a product; explains the process of software test planning, test analysis and design, and test management; discusses test outsourcing, and test metrics and problem solving; reviews the tools available to support software testing activities, and the benefits of a software process improvement initiative; examines testing in the Agile world, and the verification of safety critical systems; considers the legal and ethical aspects of software testing, and the importance of software configuration management; provides key learning topics and review questions in every chapter, and supplies a helpful glossary at the end of the book. This easy-to-follow guide is an essential resource for undergraduate students of computer science seeking to learn about software testing, and how to build high quality and reliable software on time and on budget. The work will also be of interest to industrialists including software engineers, software testers, quality professionals and software managers, as well as the motivated general reader.

The book presents high quality papers presented at the International Conference on Computational Intelligence in Data Mining (ICCIDM 2016) organized by School of Computer Engineering, Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar, Odisha, India during December 10 - 11, 2016. The book disseminates the knowledge about innovative, active research directions in the field of data mining, machine and computational intelligence, along with current issues and applications of related topics. The volume aims to explicate and address the difficulties and challenges that of seamless integration of the two core disciplines of computer science.

Informatics, the science of processing data for storage and retrieval, is vital in today's healthcare environment. At the core of informatics practice is the electronic health record (EHR). However, the scope of informatics encompasses many areas peripheral to the EHR, such as use of mobile devices, patient portals, data analytics, telehealth, and conducting health IT research. Health informatics specialists are at the forefront of effective programs that are changing patient outcomes and education, but producing these systems is not a simple task for any healthcare professional. This book presents key informatics concepts to help readers increase knowledge and expertise. The authors begin with the phases of the system development lifecycle (SDLC): planning and analysis, design and usability, testing, training, implementation, maintenance, and evaluation. This overview provides informatics nurses, physicians, pharmacists, dentists, dieticians, and other clinical professionals with a solid foundation of knowledge of each SDLC phase, positioning them for success within any clinical system. Coverage includes: Essential tools for project management Patient safety and engagement Security and privacy concepts Healthcare clinical decision support

This book constitutes the refereed proceedings of the 17th International Conference on Model Driven Engineering Languages and Systems, MODELS 2014, held in Valencia, Spain, in September/October 2014. The 41 full papers presented in this volume were carefully reviewed and selected from a total of 126 submissions. The scope of the conference series is broad, encompassing modeling languages, methods, tools, and applications considered from theoretical and practical angles and in academic and industrial settings. The papers report on the use of modeling in a wide range of cloud, mobile, and web computing, model transformation behavioral modeling, MDE: past, present, future, formal semantics, specification, and verification, models at runtime, feature and variability modeling, composition and adaptation, practices and experience, modeling for analysis, pragmatics, model extraction, manipulation and persistence, querying, and reasoning.

Test Automation using HP Unified Functional Testing (UFT) 11.5, is the first book released globally on HP UFT 11.5, which is the latest and enhanced version of the HP test automation tool, Quick Test Professional (QTP). This UFT book has been designed with the objectives of simplicity and ease of understanding. This book is recommended both for those who are beginning to learn test automation (using QTP) and for advanced automation users. Another major highlight of this book is that you will be learning on our custom developed web based application instead of windows based flight reservation application that comes by default

with HP QTP/UFT. This application with enhanced test scenarios will bring you very close to real-time automation using HP QTP/UFT. With author's huge experience as corporate trainer on HP QTP/UFT, this book follows a unique training based approach instead of a regular text book approach. As a step by step guide, it guides the student through every step of the exercises with the help of snapshots. The book also covers the most common interview questions and answers for HP QTP/UFT. It covers new features of HP UFT 11.5 and also covers aspects of Integration of HP QTP/UFT with HP ALM (Quality Center) platform. It also discusses how to use VBscript in and working working with advanced scripting concepts in QTP/UFT. Author Navneesh Garg, has been a QTP/UFT expert, automation architect and corporate trainer on QTP/UFT for last 14+ years. He has worked on QTP versions, QTP 6.0, QTP 8.0, QTP.9.0, QTP 9.5, QTP10.0, QTP11.0 and UFT 11.5 for more than 10 years. Quotes from reviewers "A great hands-on guide on mastering automation using the new Unified Functional Testing(HP UFT) automation tool. An example custom build web based application used throughout the book ensures a quick grasp of key concepts. This book with its real life examples, is sure to benefit a novice beginner as well as seasoned automation professionals looking to step up to HP UFT 11.5, highly recommended" - S. Constancio "Outstanding book on HP QuickTest Professional (HP QTP). Rather than a text book approach, a training based approach to explain UFT features is an amazing concept. Also learning the tool over web based application is fabulous as we have complete web based application environment" - Philip Smith
