Every head shape is different, so we've pulled together some tips to help you choose the right fit.

~~Get the right fit - SHARP - SHARP - THE HELMET SAFETY SCHEME~~
SHARP stands for the Safety Helmet Assessment and Rating Programme and it's a scheme funded by the UK Government. Its aim is to reduce motorcyclist casualties by helping bikers make a more informed choice when they purchase a new helmet. Any helmet that meets the ECE 22.05 or ECE 22.06 standard is road legal in the UK.

~~The SHARP helmet reviews and price comparison site~~
Instead, SHARP tests each helmet using multiple impact points and energy levels, and then issues a "star rating." This rating is intended to be indicative of a helmet's ability to manage energy. While the DOT, ECE and SNELL ratings are designed as stand-alone safety certifications, SHARP is intended as an impact rating enhancement to the ECE 22.05 standard. For that reason, SHARP will only test helmets that have already passed ECE certification.

With a 4-star SHARP rating, it doesn't sacrifice safety. It is made from a polycarbonate shell and features a quick-release anti-scratch visor a drop-down internal sun visor, multiple vents, removable cheek pads and a micro-metric retention strap. See the latest price. Also Great.

~~Cheap Motoreyele Helmet Guide - Biker Rated~~
SHARP perform 30 linear and 2 oblique tests on a minimum sample size of 7 helmets. The helmets are a range of sizes (which makes it a lot more reliable) with impacts delivered at 3 speeds (6, 7.5 and 8.5 metres per second). Like other certifying bodies, SHARP use anvils to test the performance of the lid against an impact.

~~Motoreyele Helmet Safety Ratings Explained - - -~~
Wrap a cloth measuring tape around your head just above your eyebrows and ears. Pull the tape comfortably snug, read the length, repeat for good measure and use the largest measurement.

~~Shark Helmet Size Chart - RevZilla~~
A helmet reduces the peak energy of a sharp impact. This requires a layer of stiff foam to cushion the blow. Most bicycle helmets use crushable expanded polystyrene (EPS), the picnic cooler foam. It works well, but when crushed it does not recover. Expanded polypropylene (EPP) foam does recover, but is much less common.

~~A Buyer's Guide to Bicycle Helmets~~
We've set strict criteria for this helmet buying guide because we can afford to be picky. Every helmet has to have scored a minimum 4-stars out of 5 in the SHARP tests Every helmet has to be available in at least 2 shell sizes Every helmet has to have a removable and washable lining

Expert background on Canada's history, wildlife and its aboriginal peoples. Maps and plans covering the entire country.

Since the first ATV was introduced a few decades ago, the ATV has been extremely popular. An ATV is very exciting to ride, and the sense of freedom and exhilaration a rider feels is a major draw for repeat riders. ATVs are a sport that the entire family can enjoy. But more people are hurt every year riding ATVs than nearly any other recreational activity. If you are interested in taking part in this exciting activity, there are a few things you should know before you get started. Don't Go it Alone The first thing you should do is hit the back trails alongside someone who knows what they're doing. This could be a friend, an ATV safety instructor, or perhaps a relative that has been riding for some time. the important thing is that you truly get to ride an ATV so you can see if you actually want to get one and to get yourself a feel for the machine.

The Flint River is arguably Georgia's most beautiful river, and in terms of the terrain through which it flows on its 344-mile journey, there is not another Georgia river that exposes the river traveler to more diverse vistas. From the bottomland swamps in its headwaters, through soaring views of Pine Mountain and rapids in the Piedmont, to breathtakingly clear springs in the Coastal Plain, the Flint is filled with surprises at virtually every bend. The Flint River User's Guide, the fourth in a series of Georgia River Network recreational guidebooks, is a portal to adventure on this spectacular river. The book brings to life the river's cultural and natural heritage while providing all the details needed to get out on the river and enjoy it via canoe, kayak, paddleboard, or motorized vessel. Whether in your canoe, on the river, or on your couch at home, the Flint River User's Guide will immerse you in the story of the river, which also happens to be the story of those communities along its course—from the headwaters in the suburbs of metro Atlanta to the backwaters of Lake Seminole near the Florida state line. Features: An introduction and overview of the river Chapters describing each river section with detailed maps and notes on river access and points of interest A compact natural history guide featuring species of interest found along Georgia's rivers Notes on safety and boating etiquette A fishing primer Notes on organizations working to protect the river Printed on waterproof paper

Over 270 total pages ... SUBJECT: Jumpmaster Course Student Conduct, Graduation Requirements and Grading Criteria The purpose of this memorandum is to outline the requirements for a student to successfully complete the United States Army Jumpmaster course within the administrative point system and all graded exams. 1. Students attending the Jumpmaster Course must conduct themselves in an appropriate and disciplined manner, on-duty and off-duty. Students who violate provisions of the Uniform Code of Military Justice (UCMJ) will be quickly disciplined, and may be permanently dropped from training with subsequent assignment as a non-graduate. You will receive a briefing from your NCOIC on your conduct while assigned to the Jumpmaster Course. Any violation of the items in the briefing may result in being dropped from the course. 2. Students must meet the following requirements on all exams in order to graduate from the US Army Jumpmaster Course: a. Nomenclature Exam. Student will be presented with 25 items of equipment chosen on a random basis. Student must score a minimum of 70% to receive a "GO". b. Actions During Decent Exam (pre-jump). Student will be given 30 minutes in which to recite Actions During Decent in its entirety. Student must score a minimum of 70% to receive a "GO". c. Written Exam. Student will be given one hour to answer 100 questions, to include True/False, Multiple Choice, and Fill-in the Blank. Student must score a minimum of 70% to receive a "GO". In addition to the tested material, students may lose 16 points on the exam for not following the instructions given during the test brief. d. JMPI Exam. Student will have five minutes in which to JMPI three jumpers, one wearing combat equipment, two hollywood jumpers. Using proper sequence, and proper nomenclature while identifying all deficiencies. Student must score a minimum of 70% to receive a "GO". e. Practical Work inside the Aircraft (PWAC) Exam. Students will be graded on hand and arm signals, and door check procedures, in an Air Force fixed wing aircraft while in flight. Student must score a minimum of 70% to receive a "GO". In addition to the tested material, students may lose points on the exam for improper

rigging of equipment, or failure to follow instructions. 3. Students will be given one retest for each exam (Nomenclature, Actions During Decent, Written, or PWAC) where they fail to meet the 70% standard. Students must score a minimum of 70% on any retest in order to receive a "GO." Passing scores on a retest will count towards the student's grade point average as 70%, regardless of the number of correct or incorrect answers on the exam. Students that fail to achieve the 70% standard on a retest will be dropped from the course. 4. Students who maintain an 80% or higher grade on the Nomenclature, Actions During Decent, PWAC and Written exams will be considered "Re-Entry Qualified." Re-Entry Qualified students will receive two additional attempts to pass the JMPI test. Students that fail to maintain re-entry status will still receive three attempts on the JMPI test. 5. The use of administrative points will assist the cadre in enforcing standards throughout the course. Students will begin the course with 100 administrative points and my loose re-entry status if accrued administrative points drop below 80%.

In bright light, it is easier to take a beautiful photograph with your DSLR. When the sun starts to go down or you are shooting indoors, a whole new skill set is needed. This new addition to the successful Field Guide Series will help you shoot what potentially could be the most lovely image without the help of natural light. No more harsh flash photographs with dreary backgrounds and no more blurry night shots that were exposed too long. Opening with a section on the qualities of different kinds of low light, the book then deals with ways of overcoming gloomy situations, whether you are shooting hand-held or on a tripod. Post-production fixes are also covered, allowing you to turn difficult shots into real works of art.

Aimed at serious photographers, this lavishly illustrated guide takes a close look at every detail of lowlight photography. Michael Freeman (The Complete Guide to Digital Photography, Mastering Digital Black & White Photography) offers in-depth analysis of the many techniques photographers must master for night and lowlight shooting. Point by point, he discusses how to keep the camera steady, what lenses and camera settings to use, and how to best apply flash, bracketing, image-stabilizing, vibration reduction, and noise reduction. He also outlines common lowlight situations, from stormy weather and deep shade to twilight, moonlight, city lights, and nightclubs. Finally, Freeman examines software programs and processes that will increase the quality of lowlight photographs.

From its small headwaters in Hall County, Georgia, the North Oconee winds nearly seventy miles, tumbling over granite outcroppings at Hurricane Shoals and on to Athens, where it meets the Middle Oconee. From there, the Oconee courses 220 miles through east-central Georgia to meet the Ocmulgee convergence near Lumber City, forming the Altamaha River, which flows to the Atlantic Ocean. As the Oconee's importance as a recreational amenity has grown over the years, University of Georgia students and instructors, the Altamaha Riverkeeper, Georgia River Network, Upper Oconee Watershed Network, and the North Oconee River Greenway have worked together to create a plan for water trails and recreational trails along the river as it flows through Athens. In the Oconee River User's Guide, both novice and experienced water sports enthusiasts will find all the information required to enjoy the river, including detailed maps, put in and take out suggestions, fishing and camping locations, mile-by-mile points of interest, and an illustrated guide to the animals and plants commonly seen in and around the river. Daytrippers will enjoy Joe Cook's fascinating description of the cultural and natural heritage of this richly diverse waterway. The Oconee River is home to seventy-four species of fish, including the Altamaha shiner, found only in the Altamaha River basin, as well as thirty-seven species of salamanders and frogs and forty-three species of reptiles, including the American alligator, found in the lower Oconee downstream of Milledgeville. FEATURES: an introduction and overview of the river chapters describing each river section with detailed maps and notes on river access and points of interest a compact natural history guide featuring species of interest found along Georgia's rivers notes on safety and boating etiquette a fishing primer notes on organizations working to protect the river
