This handbook is intended to be a comprehensive reference for the various chemical aspects of foods and food products. Apart from the traditional knowledge, this book covers the most recent research and development of food chemistry in the areas of functional foods and nutraceuticals, organic and genetically modified foods, nonthermal food processing as well as nanotechnology. This handbook contains both the basic and advanced chemistry both for food research and its practical applications in various food related industries and businesses. This book is appropriate for undergraduates and postgraduates in the academics and professionals from the various disciplines and industries who are interested in applying knowledge of food chemistry in their respective fields.

This edited book provides a comprehensive overview of modern strategies in fruit crop breeding in the era of climate change and global warming. It demonstrates how advances in plant molecular and genomics-assisted breeding can be utilized to produce improved fruit crops with climate-smart traits. Agriculture is facing a number of challenges in the 21st century, as it has to address food, nutritional, energy and environmental security. Future fruit varieties must be adaptive to the varying scenarios of climate change, produce higher yields of high-quality food, feed, and fuel and have multiple uses. To achieve these goals, it is imperative to employ modern tools of molecular breeding, genetic engineering and genomics for (precise) plant breeding to produce (designed) fruit crop varieties. This book is of interest to scientists working in the fields of plant genetics, genomics, breeding, biotechnology, and in the disciplines of agronomy and horticulture.

The glazed terracotta technique invented by Luca della Robbia, along with his exceptional skill as a sculptor, placed him firmly in the first rank of Renaissance artists in the fifteenth century. This quintessentially Florentine art - taking the form of dazzling multicoloured ornaments for major buildings, delicately modelled and ingeniously constructed freestanding statues, serene blue-and-white devotional reliefs, charming portraits of children, and commanding busts of rulers, along with decorative and liturgical objects - flowed in abundance from the Della Robbia workshops for a hundred years. Developed further by each generation, the closely held technique achieved new heights of refinement and durability in modelling and colour, combining elements of painting and sculpture into a new and all but eternal medium. In the 19th century, revived interest in the Renaissance and in the Della Robbia brought their works into major collections beyond Italy, particularly in England and the United States. Recently, renewed attention from art historians, backed by sophisticated technical studies, has reintegrated the Della Robbia into the mainstream of Renaissance art history and illuminated their originality and accomplishments. This beautifully illustrated book invites readers to experience one of the great inventions of the Renaissance and the enduring beauty it captured.

Excerpt from Delmar's New, Revised and Complete Classified Trades Directory and Mercantile Manual of Mexico, Central America and the West India Islands: Giving the Names and Addresses of All the Leading Merchants, Dealers, Planters, Mine Owners, Professional Men and Others in the Principal Cities and Towns The object. Of this work is to present to the mercantile com munity a thoroughly practical, comprehensive, instructive and useful Commercial Guide and Classified Business Directory of the countries named. I have endeavored to present a work which will afford the greatest amount of useful information in the briefest and most direct manner possible. In compiling this work for business men, I decided to eschew all unnecessary historical and political statistics and other useless twaddle, of little or no interest to the business com munity, confining myself solely to such statistical and general information as will prove useful to business men seeking or desiring trade relations with the countries named in this work. Besides a practical commercial guide book, this work presents a full, complete and strictly reliable, recently compiled Classified Business Directory of Mexico, Central America and the West Indies, giving the names and addresses of all merchants, dealers, planters, mine owners, professional men, and others who are buyers of and dealers in American and English goods.
