and fittingly fats, isn't
it? You have to favor to in
this tune

The Biogas Handbook Science Production

Biogas (or sewage gas)
production has been a
standard process since the
1930s for the stabilisation
of sewage sludge. What has
changed over the last 40
years or so is that biogas
production has been achieved
on a more industrial scale,
with a higher efficiency,
degree of complexity and
specification, particularly
in Europe and in North
America.

Biogas production is an eco-friendly strategy for energy production from biomass and the residue can be used as a soil conditioner. Biogas is produced by the anaerobic biological breakdown of organic matter. It primarily consists of methane and carbon dioxide.
