Little-known United Nations Police Force. While facing armed assailants and bloody riots in war-torn Kosovo, he slowly learns the skills necessary to survive. At turns surprising, funny, and gut-wrenching, this is the hopeful story of the ordinary yet extraordinary people who have figured out how to build lasting peace in their communities The word "peacebuilding" evokes a story we've all heard over

and over: violence breaks out, foreign nations are scandalized, peacekeepers and million-dollar donors come rushing in, warring parties sign a peace agreement and, sadly, within months the situation is back to where it started--sometimes worse. But what strategies have worked to build lasting peace in conflict zones, particularly for ordinary citizens on the ground? And why should other ordinary citizens, thousands of miles away, care? In *The Frontlines of Peace*, Severine Autesserre, award-winning researcher and peacebuilder, examines the

Delphi well-intentioned but inherently flawed peace industry. With examples drawn from across the globe, she reveals that peace can grow in the most unlikely circumstances. Contrary to what most politicians preach, building peace doesn't require billions in aid or massive international interventions. Real, lasting peace requires giving power to local citizens. The Frontlines of Peace tells the stories of the ordinary yet extraordinary individuals and organizations that are confronting violence in their communities effectively. One thing is

Delphi Clear: successful examples of peacebuilding around the world, in countries at war or at peace, have involved innovative grassroots initiatives led by local people, at times supported by foreigners, often employing methods shunned by the international elite. By narrating success stories of this kind, Autesserre shows the radical changes we must take in our approach if we hope to build lasting peace around us--whether we live in Congo, the United States, or elsewhere.

The following chapters focus on the principles on which the policy on UN peacekeeping is based; the skill and technique requirements for the chief aspects of a peacekeeper's duties; and the organization and procedures for the logistics support of a UN operation at the level of UN Headquarters, Force Headquarters, and National Contingent. Do States, through their military forces, have legal obligations under human rights treaties towards the local civilian population during UN-mandated peace operations? It is frequently claimed that it is unrealistic to require compliance with human rights treaties in peace operations and this has led to an unwillingness to hold States accountable for human rights violations. In this book, Kjetil Larsen criticises this position by addressing the arguments against the applicability of human rights treaties and demonstrating that compliance with the treaties

is unrealistic only if one takes an 'all or nothing' approach to them. He outlines a coherent and more flexible approach which distinguishes clearly between positive and negative obligations and makes treaty compliance more realistic. His proposals for the application of human rights treaties would also strengthen the legal framework for human rights protection in peace operations without posing any unrealistic obligations on the military forces.
