Toslend & Rivas Chapter 11/Reid (1997) Flashcards | Quizlet

Toslend and Rivas (2008) define group work as a goal directed activity aimed at accomplishing tasks. Members of the group have the opportunity to share ideas, feelings, thoughts, beliefs, engage in interactions and also share experiences. The group members develop feelings of mutual interdependence and a sense of belonging.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This comprehensive group practice text prepares students to work with either treatment or task oriented groups, this comprehensive revised edition offers the most up-to-date research available and continues to stress the importance of developing skills in group-work. Students receive a thorough grounding in areas that vary from treatment to organizational and community settings. Numerous case studies, practice examples, and guiding principles add to the ease and readability of this popular text. Content is tied to CSWE's core competencies and practice behaviors that are necessary for generalist and specialized social work practice with groups.

For courses in Group Social Work Practice A comprehensive, coherent, organized overview of group work practice from a generalist practice perspective. Widely used by professionals, educators, and students in undergraduate and graduate courses in schools of social work throughout the United States and the world, An Introduction to Group Work Practice presents a comprehensive, coherent, organized overview of group work practice from a generalist practice perspective. The new Eighth Edition continues to include typologies illustrating group work practice with task and treatment groups at the micro-, meso-, and macro-levels. Thoroughly updated throughout, the new edition includes research on virtual groups, updated and deeper content on practice with treatment and task groups, the most current literature on working with reluctant and resistant group members, updated and expanded sections on working with individuals who have difficulty engaging in and sustaining work in groups, updated material on leadership and diversity, and thoroughly updated reference material and new content from evidence-based practice sources.

This comprehensive revised edition offers the most up-to-date research available and continues to stress the importance of developing skills in group-work. Students receive a thorough grounding in areas that vary from treatment to organizational and community settings. Numerous case studies, practice examples, and guiding principles add to the ease and readability of this popular text. Content is tied to the competencies needed for generalist and specialized social work practice with groups.

Group Work with Populations at Risk, Second Edition is a fundamental resource for social workers and those in related health professions. Accessible and practical as well as theoretically sound, it is an essential reference for students and practitioners with little specific training in group work. This extensively revised edition provides tangible techniques and concrete guidelines on applying group work skills to a variety of situations. It is a comprehensive guidebook for those working directly with clients facing social problems or health conditions such as AIDS, cancer, addiction, head injury, divorce, mental illness, or abuse. Specific resources for further study and materials for use with each population are essential chapter components. With new chapters on internet self-help groups, group work with Asian-American immigrants, community and organizational factors, victims of school and community violence, and evidence-based practice, this nuts-and-bolts resource offers students and professionals clear, practical guidelines for applying specific skills and assessment measures to a broad range of group work environments.

Two leaders in the field of social work with groups address the need for more knowledge about the collective processes and practices centered around the task of work objectives. In this important book the editors have assembled a rich collection of articles on work with administrative groups. Contributors demonstrate how groups in the workplace, particularly those in social welfare agencies, can be facilitated in achieving objectives by the professional approach of the skilled group worker. Concepts are presented for analyzing the group processes and group dynamics found in administrative groups. The practical skills needed for serving as effective leaders and members of administrative groups are discussed, as well as qualitative and quantitative approaches for examining the efficacy of administrative group meetings.

This comprehensive handbook presents major theories of social work practice with groups and explores contemporary issues in designing and evaluating interventions. Students and practitioners gain an in-depth view of the many ways that groups are used to help people address personal problems, cope with disabilities, strengthen families and communities, resolve conflict, achieve social change, and more. Offering authoritative coverage of theoretical, practical, and methodological concerns--coupled with a clear focus on empowerment and diversity--this is an outstanding text for group work and direct practice courses.

A valuable guide to working with groups for a variety of purposes in the human services. Its distinctive strength is the focus on 'thinking group' and on theory informed reflective practice. Grounded throughout in the rich experiences of 'group insiders', the book is both engaging and informative. Definitely a recommended resource for practitioners, students and educators. Ros Thorpe, Professor of Social Work and Community Welfare, James Cook University Group facilitation is a core skill for social workers, community workers, youth workers, health workers and psychologists. Inside Group Work offers a guide to group work theory and practice in a variety of human service settings. Drawing on thought-provoking contributions from experienced group leaders and participants, Fiona McDermott outlines the various ways in which group work can be used. Focusing particularly on psychoeducation groups, psychotherapy groups, mutual aid groups and social action groups, she explains that the purpose of the group should determine the form it takes. The key facilitation skills of listening, observing, intervening and responding under pressure are outlined. But McDermott argues these skills by themselves are not sufficient. Rather, facilitators need to 'think group' in order to be most effective. McDermott also explains the various stages groups go through, and looks at ways in which group facilitators can handle typical problems. She explores issues of power and leadership, and also the influence of gender, sexuality, ethnicity and age.

This clear and concise study guide provides sample examinations and guidance for counsellors who wish to become certified by either the Council for the Accreditation of Counseling and Related Education (CACREP) or the National Board for Certified Counselors (NBCC), the major counsellor accreditation institutions in the United States. This Second Edition brings up to date the names of key organizations, and adds new information relevant to changes in the counsellor certification exam.
