Geankoplis was listed as a reference text for our transport operations class, McCabe being the primary text for the course. I'm glad that I spent the extra money to acquire the text Transport Processes and Unit Operations because it was far better at teaching problem solving methods, especially other methods rather than just McCabe Thiele diagrams.

These unit operations are common to all types of diverse process industries. For examples, the unit operation distillation is used to purify or separate alcohol in the beverage industry and hydrocarbons in the petroleum industry. Drying of grain and other foods is similar to drying of lumber, filtered precipitates, and rayon yarn. The unit operation absorption occurs in absorption of oxygen ...

A "pure" unit operation is a physical transport process, while a mixed chemical/physical process requires modeling both the physical transport, such as diffusion, and the chemical reaction. This is usually necessary for designing catalytic reactions , and is considered a separate discipline, termed chemical reaction engineering .
