Today's learners master both basic and advanced skills in Visual Basic for Applications (VBA), the programming language for Microsoft Office, with this essential tool. Albright's VBA FOR MODELERS: DEVELOPING DECISION SUPPORT SYSTEMS WITH MICROSOFT OFFICE EXCEL, 5E teaches how to automate common spreadsheet tasks as well as create the sophisticated management science applications needed in business today. The first half of the book introduces readers to the fundamentals of VBA for Excel. The second half of the book puts knowledge into action as it illustrates how to automate a number of management science models using VBA. Students learn to develop clean code and user-friendly interfaces for inputs and results. A new section familiarizes readers with PowerPivot and the new Excel Data Model. Novices as well as more experienced professionals will find the skills and background they need to maximize their VBA skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This book helps students learn to use Visual Basic for Applications (VBA ? a programming environment within Microsoft Office) as a means to automate methods and models and create special applications. With VBA, sophisticated management

science techniques work behind a clean and simple interface. Gaining valuable experience, students will develop applications that are user friendly and tailored to a specific problem while the "number crunching" takes place behind the scenes of Microsoft Excel.

Chris Albright's PKG VBA FOR MODELERS + PAC is an essential tool for helping students learn to use Visual Basic for Applications (VBA) as a means to automate common spreadsheet tasks, as well as to create sophisticated management science applications. VBA is the programming language for Microsoft Office. PKG VBA FOR MODELERS + PAC contains two parts. The first part teaches students the essentials of VBA for Excel. The second part illustrates how a number of management science models can be automated with VBA. From a user's standpoint, these applications hide the details of the management science techniques and instead present a simple user interface for inputs and results. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Chris Albright's VBA FOR MODELERS, 4TH EDITION is an essential tool for helping students learn to use Visual Basic for Applications (VBA) as a means to automate common spreadsheet tasks, as well as to create sophisticated management science applications. VBA is the programming language for Microsoft Office. VBA FOR MODELERS contains two parts. The first part teaches students the essentials of VBA for Excel. The second part illustrates how a number of management science models can be automated with VBA. Visual Basic Application (VBA) is one of the powerful tools that Microsoft Office Excel can offer you. It is the best when you master both basic and advanced skills of VBA.

Master data analysis, modeling, and spreadsheet use with BUSINESS ANALYTICS: DATA ANALYSIS AND DECISION MAKING, 6E! Popular with students, instructors, and practitioners, this quantitative methods text delivers the tools to succeed with its proven teach-by-example approach, user-friendly writing style, and complete Excel 2016 integration. It is also compatible with Excel 2013, 2010, and 2007. Completely rewritten, Chapter 17, Data Mining, and Chapter 18, Importing Data into Excel, include increased emphasis on the tools commonly included under the Business Analytics umbrella -- including Microsoft Excel's "Power BI" suite. In addition, up-to-date problem sets and cases provide realistic examples to show the relevance of the material. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Visual Basic Application (VBA) is one of the powerful tools that Microsoft Office Excel can offer you. It is the best when you master both basic and advanced skills of VBA. So you can become a skilled modeler we have made available an incredible short book titled "SECRETS OF VBA FOR MODELERS: DEVELOPING DECISION SUPPORT SYSTEMS WITH MICROSOFT OFFICE EXCEL." Our book is powerful that it provides you with everything you need to learn how to automate common spreadsheet tasks and also create the sophisticated management science applications needed in business nowadays. The benefits of our top winning short book almost exceed your imaginations. Some of the things you can gain from our book are: Introduces you to the fundamentals of VBA using Excel Shows you the easy way to automate methods and models and create special applications The product has a good navigation index so it can be used as a reference guide Offers good readability, so you don't need to spend hours before knowing and learning the secrets You will learn sophisticated techniques without any difficulty Although, we cannot argue the fact that our product is not fully detailed, showing the secrets of VBA for modelers has been our focus. The secrets of VBA in this top-notch book would help save your time by showing you how the program can help crunch numbers, so you won't need to a stay long night trying to make it work. Purchasing our product could save about US$1000 which is a lot of money that can take care of other basic needs. We ensure the price is suitable for all pockets and in fact, the product is a good value for the money. The more you procrastinate purchasing this amazing short book, the more you be at the risk of staying a long night and getting your time wasted. To save yourself from a sleepless night because you are working on a data or number and have more time to yourself, click the buy button on the upper right side of the page and obtain your copy of the book in just a single click! Remember, the more you procrastinate, the more you waste your time and get your work delayed. So grab your copy now and learn more effective modeling techniques than ever before!
